

Database Technologies - Assignment 6

¹Use Group by clause with appropriate SQL functions to solve following queries.

Note: To solve below queries, use “sales” database

1. Write a query that counts the number of salespeople registering orders for each day. (If a salesperson has more than one order on a given day, he or she should be counted only once.).
2. Write a query on the Customers table that will find the highest rating in each city. Put the output in this form:
For the city (city), the highest rating is: (rating).
- 3 Write an SQL query to calculate the total order amount for each day and display the results in descending order of total orders.
4. Write a query that selects the total amount in orders for each salesperson for whom this total is greater than the average amount of the order in the table.
(Note Use the average amount value directly →2565.84)
5. Write a query that selects the highest rating in each city.
6. Retrieve the maximum order amount for each salesperson from the orders table, including only those orders whose value exceeds Rs. 3000.
7. Write an SQL query to find the smallest order placed by every customer.

Database Technologies - Assignment 6

Note: To solve below queries. use “hr” database

1. Display manager ID and number of employees managed by the manager.
2. Display the country ID and number of cities we have in the country.
3. Display average salary of employees in each department who have commission percentage.
4. Display job ID, number of employees, sum of salary, and difference between highest salary and lowest salary of the employees for each job.
5. Display job ID for jobs with average salary more than 10000.
6. Display the years in which more than 10 employees joined.
7. Display departments in which more than five employees have commission percentage.
8. Display employee ID for the employees who did more than one job in the past.
9. Display job ID of jobs that were done by 2 or more employees for more than 100 days individually.
10. Display the department ID, year of hiring, and the number of employees who joined each department in each year.
11. Display the count of employees joined in each month of the year 2017.
12. Display the details of departments in which the maximum salary is more than 10000.
