

Database Technologies - Assignment 8 OPTIONAL

Use sub-query to solve following problems.

Note: To solve below queries, use “sales” database

1. Write a query to display the order amount, customer names and ratings of all customers where the amount is greater than the average amount from the orders table.
2. Write a query that selects the total amount in orders for each salesperson for whom this total is greater than the amount of the largest order in the table.
3. Write a query that selects all customers whose ratings are equal to or greater than ANY of Serres'. (Hint: find all customers of serres salesperson).
4. Write a query that selects all orders for amounts greater than any for the customers in London.
5. Find salespeople number, name and city who have multiple customers. Display the count of customers as well.
6. Find all orders with amounts smaller than any amount for a customer in San Jose.
